

Castle Resources Inc. Is a Toronto-based junior mineral exploration company focused on high-quality, advanced exploration gold projects. Management's goal is to quickly advance the Elmtree Gold Project in N.B. Canada. In addition the company is in the process of securing strategic mineral exploration and development blocks in the Stewart B.C. gold camp. For more information please visit the Castle Resources website at www.castleresources.com

Horseshoe Gold Property, Stewart, British Columbia, Canada

Castle has recently acquired the Horseshoe Property in the Stewart Gold Camp. This 17,000 ha block includes a high-grade epithermal gold vein system at surface and numerous other showings. In addition, negotiations continue to acquire other strategic exploration assets in the Stewart B.C. gold camp.

- The first acquisition is a prospective group of claims called the Horseshoe Property, which includes a high-grade vein zone. The High-Grade Vein has received the most exploration attention on the property. According to a Minister of Mines Annual Report in 1926, a sample of quartz vein material assayed 86.2 g/t gold and 123 g/t silver. During a recent property visit, grab samples collected from the High-Grade Vein included analyses of 20.7 g/t Au, 68.3 g/t Ag and 1.04 g/t Au, 156 g/t Ag and 2% Cu.
- The Clone prospect is located 8 km to the southwest controlled by Teuton Resources/Silver Grail Resources (Canasia Industries is earning-in 50% interest). In a press release dated Oct 22, 2009, Teuton/Silver Grail announced several high-grade gold assays over several metres including an intersection of 44.75 g/t gold across 12.8 m (42 ft of 1.305 oz/t gold).
- Stewart is most noted for its historic gold and copper mines such as Eskay Creek, Granduc, Galore Creek and Premier. The closest former producer to the Horseshoe Property is known as the Porter-Idaho located less than 750 metres to the north property boundary.
- Castle can also acquire 29 unpatented mining claims comprising 10,957 hectares adjacent to and along strike of some of the major discoveries within the Stewart gold camp.

Highlights:

Horseshoe Property deal recently announced

~ Grab samples: 20.7 g/t Au, 68.3 g/t Ag
1.04 g/t Au, 156 g/t Ag, 2%Cu

Negotiations continue on the acquisition of strategic exploration assets in the Stewart Gold Belt
